INTERIOR DESIGN

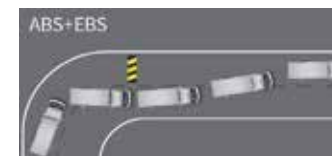

The interior layout is exquisite, intelligent and convenient, adopting a wrap around center console design for safe and convenient driving.

Reverse image

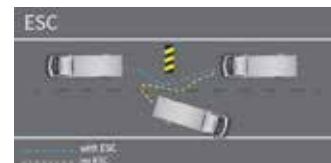

Reverse radar

Proactively prevent the vehicle from locking up during emergency braking to prevent loss of control.

Improve the visibility and safety in low-speed driving conditions. Effective protection for personal safety and other traffic participants.

When the vehicle deviates from the road, oversteer or understeer, ESC will adjust the power output and actively grasp driving safety.

Ensure vehicle start steadily.

SAFETY

4 in 1 Intergrated Controller: High intergrated, less space, less weight. Easy to maintain and repair.

CATL

500-600 IP 68 waterproof and dust-proof grade system and excellent mechanical protection, the battery passes extreme tests such as collision, extrusion, immersion, fire, salt spray, short circuit, etc., and keeps the battery at the optimal working temperature.

Front Axle:
1.5 tons carrying capacity.

Rear Axle:
3 tons carrying capacity.

610L high-strength steel, 38% stronger than the 510L material which is used in the same class truck.

INTELLIGENT DESIGN

5-inch monochrom TFT instrument. Easy to see the speed, energy consumption and energy recovery power etc.

7-inch high sensitivity touch display screen; Support to use of radio, blue-tooth audio playback, and hands-free phone calls; Integrated reversing camera.

Knob shifting makes driving easy and no clutch is needed.
